

UNIFY

GOVERN

ACTIVATE

Finance, sourcing and legal, finally reading the same numbers.

Spend, supplier and contract data from every ERP, contract and supplier system, unified into one governed real-time foundation — with specialized agents for sourcing, contracts, finance and demand on top.

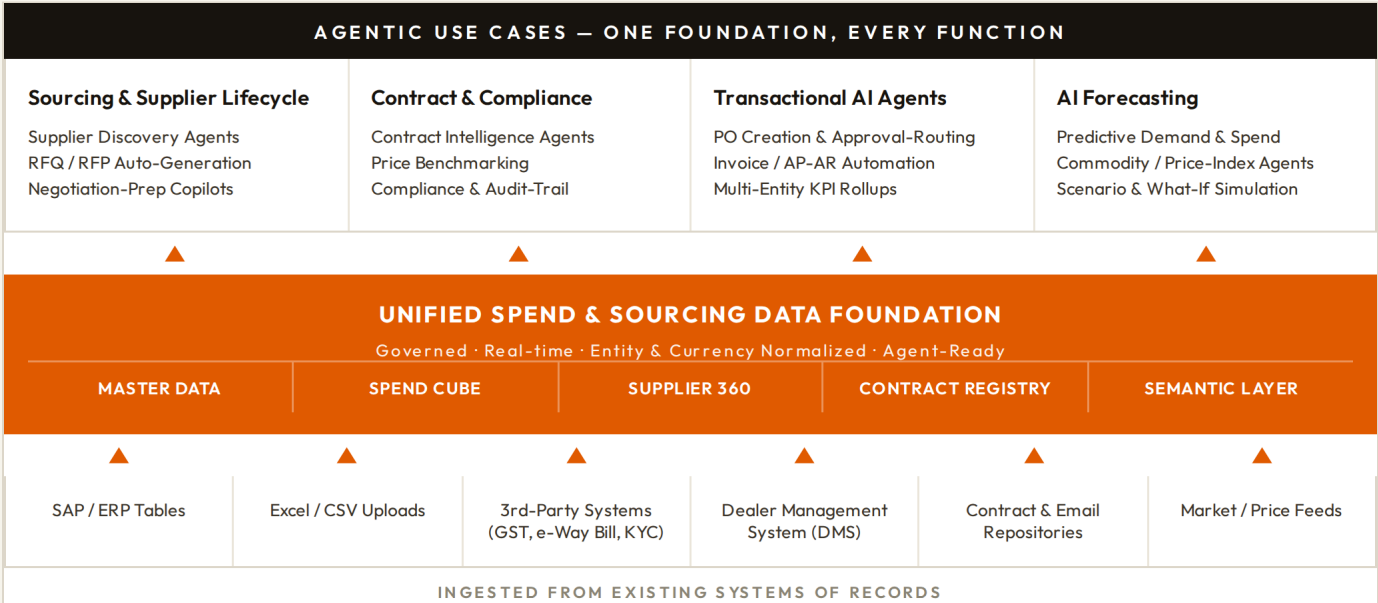

INDUSTRIES	WORKS WITH	BUILT FOR
All industries	SAP · ERP tables · Excel / CSV · GST & e-Way Bill · KYC · DMS	CPOs & sourcing leaders · CFOs & finance transformation · Category & contract managers · Supply chain & demand planning

5–15% savings SURFACED BY STRUCTURED SPEND ANALYSIS	8–15% lower risk CONTINUOUS SUPPLIER RISK MONITORING & SCORING	20% fewer surprises FIRMS USING PREDICTIVE SPEND & DEMAND FORECASTING
---	--	---

One governed foundation. Every function, built on top of it.

TODAY Spend data in five places ERPs, contract repositories and supplier portals each hold part of the picture. Every analysis starts with a reconciliation, and no two functions agree on the number.	THE USUAL FIX Another dashboard A BI layer over unreconciled sources. It renders faster, but it inherits the same fragmentation — and it cannot act.	HUMAINEETI Foundation, then agents Existing systems of record feed one unified, governed spend data foundation — with specialized AI agents running on top of it for sourcing, contracts, finance and demand.
--	--	---

One foundation, every function ERP tables, spreadsheets, GST and e-Way Bill feeds, DMS and contract repositories ingest into one governed foundation — master data, spend cube, Supplier 360, contract registry and semantic layer — with agents for sourcing, contracts, transactions and forecasting on top.

How it runs

01 Unify Spend, supplier and contract data from every existing system of record.	02 Govern One real-time foundation — entity- and currency-normalized, agent-ready.	03 Activate A hub of specialized agents for sourcing, contracts, finance and demand.
---	---	---

What you get

- › Spend, supplier and contract data unified into one governed, real-time foundation

› Continuous supplier risk monitoring and scoring

› Specialized agents for sourcing, contracts, finance and demand
- › 5–15% savings surfaced by structured spend analysis

› Predictive spend and demand forecasting, for fewer surprises

› An Executive Summary landing view per persona, from day one

INCLUDED FREE · DEMO + POC · ONE CATEGORY OR BUSINESS UNIT · YOUR EXTRACTS · NO COST

Bring one spend category — see the governed foundation on real data.

HOW IT RUNS

■ You pick one spend category or business unit to scope

■ We ingest your ERP, contract and supplier extracts into the foundation

■ You see the Executive Summary view and agent output on your own data

WHAT YOU PROVIDE

■ Spend extracts from one ERP or business unit

■ A contract and supplier master list for that category

■ A category manager for a short calibration session

WHAT YOU GET BACK

■ A governed spend view for that category, reconciled

■ A savings and supplier-risk read with the drivers shown

■ A persona-based Executive Summary you can circulate

ONE FREE ENGAGEMENT · DEMO + POC

See it on one of your own categories.
