

CLOSED-LOOP EHS

LEADING INDICATORS

NO-CODE

Safety is a system of record, not a filing cabinet.

Incidents, behaviour-based safety, audits, occupational health, CAPA and analytics on one no-code system of record — from first report to verified closure, on a trail a regulator can read.

INDUSTRIES

Chemicals & process · Manufacturing & heavy industry · Power & utilities · Construction & infrastructure · Pharma & life sciences · Oil, gas & mining

WORKS WITH

Web & mobile · No-code forms · RBAC · India data residency

BUILT FOR

Heads of EHS & safety · Plant & operations leaders · Manufacturing & process industries · Compliance & risk teams

6 modules, 1 record

INCIDENTS · BBS · AUDIT · OCC-HEALTH · CAPA · ANALYTICS

Closed-loop CAPA

EVERY ACTION OWNED, DUE-DATED, VERIFIED & AUDIT-LOGGED

Multi-plant, multi-tenant

SITE HIERARCHY, RBAC & INDIA DATA RESIDENCY BUILT IN

Inboxes and trackers, or a suite nobody can change.

APPROACH A

Spreadsheets & email

Incidents in inboxes, actions in trackers. No workflow, no due-date enforcement, and no single source of truth when the auditor calls.

APPROACH B

Legacy EHS suite

Heavy, rigid and consultant-configured. Every form or workflow change is a change request — and leading indicators are bolted on late.

HUMAINEETI

IntelliEHS

Workflow-driven, no-code and AI-assisted. Report to verified closure in one auditable record — configured by your own team, per plant.

Six modules, one record Incidents, behaviour-based safety, audit, occupational health, CAPA and analytics in one workflow-driven, no-code system of record.

6 MODULES, 1 RECORD

01 Incidents	02 BBS	03 Audit	04 Occ-Health	05 CAPA	06 Analytics
-----------------	-----------	-------------	------------------	------------	-----------------

Incidents, behaviour-based safety, audits, occupational health and CAPA in one workflow-driven, no-code system of record.

At a glance

	SPREADSHEETS	LEGACY EHS	INTELLIEHS
Report → RCA → CAPA → verified close in one flow	—	✓	✓
Leading indicators (BBS) beside lagging incidents	—	—	✓
No-code forms, workflows & roles, tuned per site	—	—	✓
AI copilots draft RCA, CAPA & management summaries	—	—	✓
Full audit trail on every field, action & decision	—	✓	✓
Multi-tenant with site hierarchy & data residency	—	—	✓

What you get

- › Incidents, BBS, audits, occupational health & CAPA in one record
- › Loss-causation RCA, with leading indicators beside the lagging ones
- › AI copilots that draft RCA, CAPA and management summaries
- › Every corrective action owned, due-dated, verified & audit-logged
- › No-code forms, workflows, roles & org hierarchy — tuned per plant
- › A regulator-ready audit trail on every field and decision

INCLUDED FREE · DEMO + POC · ONE PLANT OR SITE · YOUR OWN FORMS · NO COST

Put your next incident on the closed loop — one plant, no cost.

HOW IT RUNS

- We configure your incident and CAPA workflow for one site — no code
- Your team reports real observations and runs them to verified closure
- You see the audit trail a regulator would actually read

WHAT YOU PROVIDE

- Your current incident and CAPA forms
- One site and its reporting hierarchy
- An EHS lead to walk through the workflow

WHAT YOU GET BACK

- A live closed-loop workflow for that site, configured to your forms
- Leading indicators (BBS) beside your lagging incident data
- AI-drafted RCA and management summary on a real incident

ONE FREE ENGAGEMENT · DEMO + POC

Start with your next incident.
