

VOICE-DRIVEN BI

CITED ANSWERS

ANY LANGUAGE

# Ask it the way you'd ask an analyst. Get the answer, cited.

A voice and chat layer over the BI stack you already own — a cited, persona-based answer in seconds, in any language, drawn from live governed data rather than a stale extract.

INDUSTRIES

BFSI & fintech · Retail & D2C · Manufacturing · Media & OTT · Healthcare

WORKS WITH

Your BI stack · Semantic layer · Text-to-SQL · RBAC & lineage

BUILT FOR

CXOs & business heads · CFOs & finance teams · Sales & operations leaders · Heads of data & analytics

50%+ by 2026

OF ENTERPRISE ANALYTICS QUERIES WILL BE NATURAL LANGUAGE OR VOICE, PER GARTNER

Seconds, not days

ASK-TO-ANSWER COLLAPSED FROM AN ANALYST QUEUE TO REAL TIME

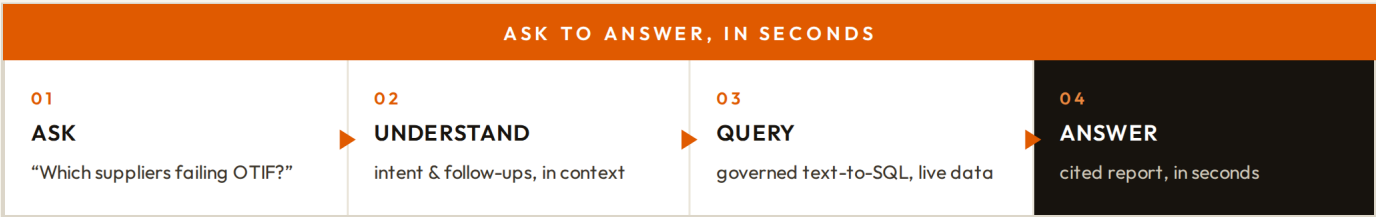

No punitive licensing

ONE REUSABLE LAYER OVER YOUR BI STACK, BUILT TO EXTEND

## Dashboards answer yesterday's question. The analyst queue answers late.

|                                                                                                                                                                        |                                                                                                                                                        |                                                                                                                                                                                                          |

## What you get

- › Ask in natural language, by voice or chat, in any language
- › Grounded in live governed data, every time
- › One reusable layer over your existing BI stack
- › A cited, persona-based report back in seconds
- › No SQL or BI-tool literacy required to ask
- › No punitive per-seat licensing to put it in front of everyone

INCLUDED FREE · DEMO + POC · ONE DATASET OR SEMANTIC MODEL · NO COST

### Wire it to one dataset — ask it your own questions.

#### HOW IT RUNS

- We connect InVocIQ to one governed dataset or semantic model
- You and your team ask the questions you actually ask your analysts
- You compare answer, citation and speed against your current route

#### WHAT YOU PROVIDE

- Read access to one dataset or semantic model
- A handful of real questions your analysts get asked
- One business user and one data owner for a short session

#### WHAT YOU GET BACK

- A live voice and chat interface over that dataset
- Cited, persona-based answers to your own questions
- An honest read on coverage and where governance gaps sit

ONE FREE ENGAGEMENT · DEMO + POC

**Ask your own data, out loud.**
