

EVIDENCE-BASED EXTRACTION

AUDIT-READY

FUZZY SEARCH

Every contract, read once. Findable forever.

Executed instruments read once and findable forever — roughly twenty fields per document, each with a confidence score and a page citation, filed into a fuzzy-searchable archive.

INDUSTRIES

Banking & trade finance · Real estate & property ·
Legal & compliance · Tax & regulatory

WORKS WITH

OCR · Retrieval-grounded checks · Tagged archive

BUILT FOR

Corporate legal & contracts · Compliance & risk ·
Banking & trade finance · Real estate, tax &
regulatory affairs

~20 fields, cited

EVERY EXTRACTED VALUE LINKED TO ITS
SOURCE PAGE

Confidence-gated

BELOW THRESHOLD GOES TO A HUMAN
REVIEWER

Fuzzy search

FIND ANY DOCUMENT, EVEN WITH A TYPO
OR PARTIAL MATCH

A folder tree or a keyword index. Both lose the document.

APPROACH A

Shared drive folders

Documents are saved in a folder tree by whoever uploaded them. Finding one later means remembering the exact file name — no field, clause or date is ever queried directly.

APPROACH B

Legacy DMS / keyword search

A document management system indexes file names and exact text. Miss a spelling, a synonym, or a scanned page with no text layer, and the search returns nothing.

HUMAINEETI

Intelligence + fuzzy search

Every document is read, classified and extracted on upload. Fuzzy keyword and tag search finds it even with a typo, a partial name or an OCR misread — with the source clause a click away.

At a glance

	SHARED DRIVE	LEGACY DMS	LDIP
Every field cited to its source page	—	—	✓
Confidence score on every extracted value	—	—	✓
Fuzzy keyword & tag search across the archive	—	✓	✓
Five agreement types on one pipeline	—	✓	✓
Two-stage human approval before delivery	—	—	✓
Full audit trail behind every decision	—	✓	✓

What you get

- › Every field extracted with a confidence score and a citation to the source page
- › Retrieval-grounded compliance analysis against your reference library
- › A searchable, tagged archive of every executed document — fuzzy match on keyword or tag
- › Automatic routing of low-confidence values to a human verification queue
- › Two-stage review and approval before a report reaches the client
- › A full, append-only audit trail behind every extracted value and every decision

INCLUDED FREE · DEMO + POC · ONE AGREEMENT TYPE · YOUR SAMPLE SET · NO COST

Send one agreement type — see it extracted, cited and searchable.

HOW IT RUNS

- You pick one instrument type and share a representative sample
- We configure the field schema, confidence thresholds and compliance references
- You search the archive the way your team actually searches it

WHAT YOU PROVIDE

- A sample set of one agreement type (redacted is fine)
- The fields your team needs off each document
- A reviewer who can calibrate the confidence threshold

WHAT YOU GET BACK

- Extracted fields with a confidence score and page citation for each
- A working fuzzy keyword and tag search over that sample archive
- An exception report showing what routed to human review, and why

ONE FREE ENGAGEMENT · DEMO + POC

Put your next executed agreement on record.
